Truelzsch K.S.;

Truelzsch K.S.;

Submitted (MAR-1995) to the EMBL/GenBank/DDBJ databases.

-i- FUNCTION: THIS BIFUNCTIONAL ENZYME CATALYZES TWO CONSECUTIVE REACTIONS CONVERTING 2', 3'-CYCLIC-NUCLEOTIDE TO 3'-NUCLEOTIDE TO NUCLEOTIDE TO NUCLEOTIDE TO NUCLEOTIDE TO NUCLEIC ACID AND PHOSPHATE.

-i- CATALYTIC ACTIVITY: Nucleoside 2',3'-cyclic phosphate + H(2) O nucleoside 3', phosphate.

-i- SUBCELLULAR LOCATION: Periplasmic.

-i- SIMILARITY: BELONGS TO THE 5'-NUCLEOTIDASE FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           DOMAIN
